## Battleship: Team Crossover Edition WORKS CITED

Battleship was developed in the Unity engine, utilizing provided libraries.

## Libraries cited:

- All UI.Buttons, Dropdowns, and UI Panels set to GameObject variables derive from the UnityEngine.UI Library.
- UnityEngine.SceneManagement library was used for the Sceen Manager to reload the game scene.
- UnityEngine library uses the default Start and Update methods created in every .cs file.

Unity3D.com: Unity Documentation Web Page for Object properties and scripting examples.

- Unity User Manual: <a href="https://docs.unity3d.com/Manual/index.html">https://docs.unity3d.com/Manual/index.html</a>|
- Unity Scripting Reference: https://docs.unity3d.com/ScriptReference/index.html

Documentation logo was obtained via <a href="https://nauticus.org/battleship-wisconsin/">https://nauticus.org/battleship-wisconsin/</a>.

Documentation instructions and config files were provided by the official Doxygen website: <a href="http://www.doxygen.nl/manual/starting.html">http://www.doxygen.nl/manual/starting.html</a>
